

5-year Pharmacology & Biotechnology Program (B.S., M.A.)

The 5-year Pharmacology & Biotechnology program combines the B.S. in Pharmacology with the M.A. in Molecular, Cellular and Developmental Biology with Emphasis in Pharmacology & Biotechnology. This program was designed to enhance students' preparation in the field of pharmacology and biotechnology, both from an academic and industrial point of view.

The 5-year-program allows students to begin taking graduate coursework in their 4th year of studies. Students apply for the program by the end of their 3rd year. Students are encouraged to complete an internship in the pharmaceutical and biotechnology industries in the summer between their 4th & 5th year. The internship gives students first-hand experience in scientific investigation in a dynamic, collaborative and for-profit industrial environment, and serves as a powerful stimulus to prepare students for graduation.
